

Pitch Deck Presentation

SchoolSphere

Helping school students turn their
achievements into real opportunities.

Presented By:

Arpit Panwar

**SCHOOL
SPHERE**

Network. Explore. Grow.

The Problem >>>>

Brilliant students. Scattered achievements. Zero structured guidance.

Students (13–18) don't have a central place to showcase academics, projects, sports, arts, and leadership.

They discover scholarships, competitions, and events through random WhatsApp forwards, teachers, or friends – highly unstructured.

Career decisions are driven by marks and herd behaviour (JEE/NEET/"commerce ya science?"), not real interests or aptitude.

Parents are anxious and willing to pay, but options are fragmented: counsellors, coaching, YouTube, influencers.

Schools are under NEP pressure to offer career guidance and portfolios, but don't have the tools or capacity.

The need for a structured approach to career guidance among youngsters

Recent studies have revealed that as much as 90% of students opt for a wrong career path due to a lack of career guidance and the persisting gap between skills and aptitudes.

 India Today / Oct 17, 2022

Our Insight

School students don't need "LinkedIn for kids". They need a profile + roadmap + community.

Students actually care about:

- Recognition (badges, visibility, proof of work)
- Real opportunities (contests, scholarships, programs, internships)
- Relatable mentors (college students, young professionals)

Parents care about:

- Clarity on where the child stands and what to do next
- Safe, structured interactions
- ROI on time and money spent on activities and coaching

Schools care about:

- Showing they provide more than marks – career readiness & holistic development
- Easy reporting for NEP and parent expectations

We're building the infrastructure layer for school student profiles and career readiness in India.

The Solution: SchoolSphere

Inter-school student profile and career readiness platform

One place where students showcase who they are, discover what's possible, and get guided on what to do next – with full visibility for parents and schools.

KEY MODULES:

Student Profiles – academics, exams, projects, hobbies, achievements, media, recommendations.

Opportunities Feed – curated scholarships, competitions, workshops, internships, events (with deadlines).

Mentorship & Networking – safe access to alumni, college students, and professionals; peer learning across schools.

Career Guidance Layer – interest/aptitude assessments, exam–career mapping (JEE/NEET/CLAT/CUET etc.), suggested paths.

Parent & School Dashboards – progress view, interests, strengths, and recommended next steps.

India Focus & Feature Deep Dive

Designed for the Indian school journey, not a copy of LinkedIn.

Exam Lens: Dedicated sections for JEE, NEET, CUET, CLAT, NDA and other Indian entrance exams – resources, webinars, recommended opportunities.

Scholarships Hub: NTSE, INSPIRE, KVPY (legacy), state schemes, NGO and corporate scholarships – aggregated and simplified.

Local Mentorship: Alumni and mentors from the same city/state/coaching; relatable, not abstract global gurus.

The global EdTech market is projected to reach \$404 billion by 2025.

Culturally relevant content: Success stories of Indian youth achievers, clear, practical pathways (Govt exams, IT, startups, design, creative fields).

Market & Business Model

Large, growing market with multiple revenue rails.

Market:

- ~250M+ K-12 students in India; ~80–100M in private schools.
- Immediate focus: urban & Tier-2 private schools, classes 8–12 – “career anxious but opportunity blind”.
- Early SAM: ~10–15M students in this segment.

Business model:

- B2B – Schools & Coaching Institutes
 - Annual per-student / per-school SaaS fee for profiles, dashboards, and assessments.
- B2C – Parents & Students
 - Affordable subscriptions (₹99–₹499/month) for advanced assessments, 1:1/group mentoring, and application support.
- Marketplace & Sponsored Listings
 - Colleges, coaching centres, ed-techs, and scholarship providers pay for premium visibility and targeted outreach.

Start as school-distributed, parent-funded, then layer on institutional partnerships.

Competition & Differentiation

Not another coaching app. Not just a counsellor. The profile layer everyone else plugs into.

Who exists today:

- Career counselling platforms – tests + 1:1 counselling; weak on ongoing profile, community, and inter-school graph.
- Coaching apps / ed-tech – exam prep focused; limited holistic profile or guided portfolio building.
- Generic professional networks – LinkedIn etc. (16+); not built for minors, parents, or Indian school context.

Our differentiation:

- Inter-school profile graph for 13–18, owned by student and portable across schools/coaching.
- India-first design: exams, vernacular, family dynamics, scholarships, local mentors.
- Triple stakeholder view: student, parent, school – all seeing the same structured truth.
- Path to becoming infrastructure: the layer on which coaching, counsellors, and colleges can run their programs.

Start as school-distributed, parent-funded, then layer on institutional partnerships.

Roadmap & Where UIncept Fits

Clear 6–12 month validation and build plan.

Stage 0 – Now (0–3 months):

- 20–30 student + parent interviews; 4–6 focus groups in target schools.
- No-code clickable prototype (profiles + opportunity feed + parent view).
- 1–2 pilot partners (schools/coaching) identified.

Stage 1 – MVP (3–6 months):

- Launch web-first MVP:
 - Student profile builder
 - Opportunity board
 - Basic parent dashboard
- Run pilots with 2–3 institutions; collect usage and NPS.

Stage 2 – Early Scale (6–12 months):

- Add assessments, mentorship flows, and regional language support.
- Onboard 10–15 schools / 500–1,000 students.
- Refine business model (paid parent cohorts, B2B pricing).

Where UIncept helps:

- Sharpening MVP scope & positioning.
- School introductions and pilot design.
- Product & GTM mentoring.
- Potential small seed to move faster once pilots click.

Future Roadmap – Beyond MVP

AI career copilot: Use student profile + exam + behaviour data to recommend careers, subjects, colleges, and timelines (not just static test PDFs).

Smart opportunity engine: AI that matches students to scholarships, competitions, and programs based on their profile and constraints (location, budget, board, stream).

Auto-profile & insights for schools: Pull data from school ERPs / report cards to auto-update profiles and give schools cohort analytics (interests, strengths, risk flags).

Regional language guidance: AI-driven chat interface in Hindi + regional languages for parents/students who aren't comfortable in English.

These depend on the data and validation from our first 10–15 school pilots

Team & Ask

Why me, why now – and what I’m asking from Ulnccept.

• Arpit Panwar – Co-Founder

- MBA with focus on data/AI & marketing.
- Experience as Associate Manager – Strategy at leading IT & Engineering solutions company
- Hands-on work with students/young professionals through mentoring, academic projects, and career planning conversations.
- Deep personal conviction about fixing the “career confusion + lack of structure” gap in Indian schools.

Falak Ameer – Co-founder, Sales & Partnerships

- Cluster Sales Manager at a leading Indian financial services company
- Manages multiple branches, builds deep relationships with frontline teams and customers, and drives revenue through on-ground sales and partner management.
- Leads school/parent acquisition, partnerships, and GTM execution for SchoolSphere.

Planned core team (near term):

- Tech co-founder / lead (full-stack, ed-tech experience).
- Education/career guidance advisor (psychometrics or counselling background).
- School partnerships & operations lead.

Ask from Ulnccept:

- Incubation: space to sharpen and validate the core wedge.
- Mentors with ed-tech and K-12 distribution experience.
- School connections for structured pilots.
- Support in preparing for seed funding once we have early traction.

I’m not looking for capital alone. I’m looking for a partner to build the default student profile & career readiness layer for Indian schools.

Thank you
